

Taiwan Journal of Pediatric Dentistry
Information for Authors

Submission of manuscripts

The **Taiwan Journal of Pediatric Dentistry** (TJPD) accepts articles related to basic and/or clinical pediatric dentistry and orthodontics, cariology, and preventive dentistry. Manuscripts accepted for publication should be original, written in either English or Chinese, and have been classified their types as follows:

1. Review article
2. Research article
3. Clinical report
4. Case report
5. Innovations and ideas

Format

1. The article is original, has not been previously published, and is not under consideration by another journal. Please e-mail electronic manuscripts to: "ta81pd06@ms19.hinet.net", or send certified mail with CD or DVD to "Taiwan Journal of Pediatric Dentistry, 3F., No.283, Sec. 2, Fuxing S. Rd., Da'an Dist., Taipei City 106". Please contact the editor for upload URL if files could not be sent by e-mail due to file size limitation.
2. Please use Microsoft Word for article writing. Disks should be labeled with title of paper, and first author's name.
3. The body of the text, either English or Chinese, including the abstract, references should not exceed 8 pages. Contact the editor for permission to exceed 12 pages, if necessary.
4. A cover letter signed by all the authors to the editor-in-chief should clearly state that the final manuscript has been seen and approved by all authors.

Manuscript organization

1. Title page: The title page should include the title of the article, running title (less than 40 letters), full name(s) of author(s), academic degrees, and institutional positions. The corresponding author's address, business telephone numbers, fax numbers, and e-mail address should be given.
2. Abstract: Provide an abstract of 400 words or less with no more than 5 keywords. Briefly state the purpose, the methods, the results, and the principal conclusions. English manuscript needs a Chinese abstract, and vice versa.
3. Text:
 - A. Review article and innovation and ideas accept any formats of manuscript.

B. Research article should include introduction, materials and methods, results, discussion, and conclusions.

(1) Introduction. Briefly state the study's objective and omit extensive review of the literature.

(2) Materials and/or Methods. Describe the experimental design procedures and subjects used.

(3) Results. Present the results of what the study had got. Use tables, charts, and figures to clarify the findings.

(4) Discussion. Point out the significance of the data and clearly identify speculations. Give answers to what you have found and discuss your findings in the light of other reports.

(5) Conclusion(s). Be sure to include a clearly labeled conclusion.

C. Clinical report should include introduction, methods, results, and discussion.

D. Case report should include introduction, case history, and discussion.

4. References: Cite references sequentially in the text in order. References in press must include author's name(s), title of article, and name of journal. Journal names must be abbreviated according to the National Library of Medicine (NLM) Title Abbreviation, for example:

(1) Journal article: Lin YT, Chang LC. Space changes after premature loss of the mandibular primary first molar: a longitudinal study. *J Clin Pediatr Dent* 1998; 22: 311-6.

(2) Complete book: McDonald RE, Avery DR. *Dentistry for child and adolescent* 5th ed, Mosby Co, St Louis, 1988; pp339-41.

(3) Chapter in book: Moore BK, Avery DR. Dental materials. In: McDonald RE, Avery DR (ed). *Dentistry for child and adolescent* 6th ed., Mosby Co., St. Louis, 1994; pp349-72.

(4) Online journal article: Yavuz MS, Aras MH, Büyükkurt MC, Tozoglu S. Impacted mandibular canines. *J Contemp Dent Pract* 2007; 8: 78-85. Available at: <http://www.thejedp.com/issue036/index.htm>. Accessed November 20, 2007.

(5) Web site: Centers for Disease Control and Prevention. Recommendations for using fluoride to prevent and control dental caries in the United States. Available at: <http://www.cdc.gov/mmwr/preview/mmwrhtml/rr5014a1.htm>. Accessed November 20, 2007.

(6) Online chapter in book: Stevens CA. Rubinstein-Taybi Syndrome. In: Adam MP, Ardinger HH, Pagon RA, Wallace SE (ed). *GeneReviews*® [Internet], University of Washington, Seattle, 1993-2021. Available at: <https://www.ncbi.nlm.nih.gov/books/NBK1526/>. Accessed February 20, 2020.

5. Illustrations, tables and legends:

(1) Each Illustration or table should be accompanied by a brief title and a legend, placed at the end of the article on a separate page. Label them in the numerical order.

(2) Figures should be submitted as picture files provided in JPG or TIFF format. Color images or Gray scale images need to be at least 300 DPI. Line art should be at least 1200 DPI.

(3) The eyes of identifiable persons must be covered up. If not, a signed consent form has to be accompanied.

(4) Photomicrographs must include an internal scale marker, the type of specimen, original magnification and stain.

Checklist for authors

- Provide a covering letter
- Provide a copyright transfer form
- Provide complete information (in English & Chinese): title of the article, running title (less than 40 letters), type of the article, names and institutions of all authors, institution, address, phone, fax numbers and e-mail address of the corresponding author
- Provide an abstract of 400 words or less with no more than 5 keywords in English & Chinese. Structured abstract for the original article: purpose, materials & methods, results, and conclusion.
- Check all references for accuracy, correct format, and completeness
- Ensure all tables, illustrations and legends are on separate pages
- Ensure all illustrations are properly formatted

Miscellaneous

If submitting by post, manuscript should be sent by certified mail with CD or DVD protected from folding. Once published, the copyright ownership of the manuscript is transferred to TJPD.
